-- The MAILING DATE of this communication appears on the cover sheet with the correspondenc address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 6, 11, 15-16, 20-21, 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim language to “or”, “and the like” defines alternative and indefinite language. Terms such as “unprovided” define indefinite negative limitation contrary to statute.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out

Art Unit: 3612

the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1, 6, 11, 15-16, 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. in view of Minami et al..

Lee et al. defines all subject matter less the cover lip including a Shore A hardness of 70-100 at root portion 30, with a seal hardness of 40-55. It would have been obvious to one of ordinary skill in the art to provide in Lee et al. a cover lip 32 as taught by Minami et al. in order to conceal a flange. The conversion chart Efundia is included to illustrate that an HS scale of 90 is equivalent to a Shore A scale of 84.

As to claim 6, the grip body is exposed.

As to claim 11, grip bodies bent at corner regions are common knowledge in the art, and heating and cooling are process steps not given patentable weight in a product claim

(MPEP 2113).

Applicant may seasonally challenge, for the official record in this application, this and any other statement of judicial notice in timely manner in response to this office action. Please specify the exact statement to be challenged. Applicant is reminded, with respect to the specific challenge put forth, of the duty of disclosure under Rule 56 to disclose material which is pertinent to patentability including claim rejections challenged by applicant.

As to claim 20, process steps to extrusion are also not given patentable weight.

7. Claims 21, 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. in view of Minami et al. as applied to claims 1 and 6 above, and further in view of Guillon.

Art Unit: 3612

It would have been obvious to one of ordinary skill to provide in the references above inner and outer walls to a grip part of unequal length as taught by Guillon in order to enhance contact force by the increased contact area. As to claims 21 and 25, both walls are of the same material.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shelton is cited to teach adhesive attachment.
